PSYCHOLOGICAL ABSTRACTS

VOLUME 73, SUBJECT INDEX I

JANUARY-DECEMBER 1986

Why can't they publish an abstract service tailored to my professional interests to save me time and effort?

They have.

It's the American Psychological Association's **PsycSCAN**, a series of inexpensive, subject-oriented publications with abstracts of the primary literature *in applied, clinical, and developmental psychology and in learning disorders and mental retardation (LD/MR).* PsycSCANs provide an overview of these fields so you can keep pace with new information and identify articles for further research—quickly and easily.

Each PsycSCAN publication covers one of the four areas, is issued quarterly (about 75 pages), and includes full bibliographic information. You get more than 1,500 abstracts in a one-year period in the discipline of your choice.

For LD/MR, abstracts are selected from the PsycINFO database taken from over 1,000 journals. The applied, developmental, and clinical PsycSCANs abstract *subscriber-selected* APA and non-APA journals. Every article in these journals will be abstracted and published in PsycSCAN. You'll vote for changes annually *as your professional needs change.*

Call or write for your sample copy today.

Each 4-issue PsycSCAN subscription: $12.50 APA members affiliates, $25 nonmembers, $28 non-US nonmembers. **American Psychological Association**, 1400 N. Uhle St., Arlington, VA 22201. Toll Free (800) 336-4980.

This Annual Subject Index, published in two volumes. consolidates more than 120,000 references to approximately 33,000 abstract records published in 12 monthly issues of *Psychological Abstracts* from January 1986 through December 1986. A companion work, the Annual Author Index, references these records by author and document title.

Index terms, selected from the *Thesaurus of Psychological Index Terms*, represent the literature covered for the periods indicated. Only terms assigned as major terms, reflecting the main focus of the article, appear in the printed subject index. (Terms assigned as minor do not appear in print but are available for online searching.) Subject matter content determines the specific terms used and, thus, not every thesaurus term will appear in every index. "See" and "See Also" references are present to direct the user to the preferred terminology or related areas of interest. Index phrases are alphabetically arranged under the appropriate index terms and represent a concise statement of the article's content or, when appropriate, identify the independent and dependent variables described in the material as well as the subject population. Style changes such as the increased use of abbreviations or the elimination of some hyphens may result in some inconsistencies and may affect the alphabetical order of phrases.
